

Why SR 167?

- There is heavy congestion at various times of day along SR 167. The general purpose lanes on SR 167 are congested much of the weekday.
- There is an existing HOV lane and it has capacity.
- Increasing population in South King County means that congestion will continue to worsen on SR 167. We need to increase the efficiency of our roadways and find new options to keep people and goods moving.
